

## Assembly instructions for the water slide

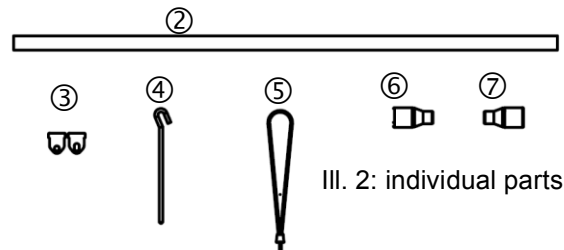

Thank you very much for choosing a **Sport-Thieme** product. Please read the instructions fully before you assemble the equipment so you can enjoy the product and its guaranteed safety:

III. 1: View

### 1. When you open the package, please ensure all the necessary parts are included:

- ① 1 x sheet 6 x 1.10 m
- ② 1 x water hose 1/2" connection
- ③ 6 x attachment clip
- ④ 6 x peg
- ⑤ 6 x rubber rope for attachment clip
- ⑥ 1 x hose adaptor (grey marking)
- ⑦ 1 x water stop (red marking) 1/2"

III. 2: individual parts

### 2. General

This slide allows you to have great fun diving on the grass. This slide really comes into its own when it is warm outside. Every child loves splashing around and will slide along this water slide with great enjoyment. The slide is made from a tear-proof sheet and has a 1/2" connection for sprinkling. It is 6 m long and 1.10 m wide.

The 2.5 mm thick sheet is very robust and thus provides carefree sliding fun.

### **3. Assembly instructions**

Spread the sliding sheet out at a suitable location (slightly sloping meadow). For the safety of users, ensure that there is a 5 m free zone at the end of the sheet. To prevent injuries and the sheet from tearing, you must check for sharp objects such as glass, nails or similar under the sheet.

Now, feed the hose through the holes at the sheet's upper end. The holes in the hose must point towards the sheet.

Attach the water stop to one end of the hose. Attach the adaptor to the other end. This is where you attach your water hose.

Assemble the attachment clip as shown in ill. 3.

Ill. 3: attachment clip

Now, tie the rubber ropes to the attachment clips and attach these to the sheet as shown in ill. 1.

Finally, push the pegs through the rubber ropes and pull the sheet taut so it lies flat on the ground.

The piece of equipment is designed for its intended use only.

**Caution: Do not overload or climb the equipment!**

#### **Maintenance and care instructions**

**Instructions:**

Carry out a visual check at regular intervals. Due to our continuous quality control of the products, technical changes may occur which may lead to slight deviations in the instructions.

Check the equipment for possible damage and replace worn-out parts.

We are happy to answer any questions you may have.
